

# "The Wonder Seed"

## The Soya Bean

By C. G. Andrus, B.S.A.

### Industrial Case

The owner of a model "A" Ford car little realizes that when he grasps the steering wheel he has a handle on the Soya Beans in his hands. Nor does he realize that his car contains the by-products from a bushel and a half of Soya Beans.

The Japanese scientists of the South Manchurian Railway have in the past found innumerable uses for the Soya Bean by-products; but it has remained for Henry Ford to utilize their knowledge, plus that of the discoverers on this continent in their practical application in automobile construction in America.

Last year Mr. Ford had a crop and utilized the output of 6,000 acres of Soya Beans. This amounted to all sown to a variety called "Hilli". Besides this acreage his plants also utilized many thousand bushels of beans purchased in the States.

The Ford Motor Company has constructed a plant costing over \$5,000,000 to handle and process the Soya Beans in their application to motor car construction.

The factory utilizes modified Royo Flour Plant in the following way: sterner wheels, push buttons, gear shift knobs, switch handles, distributor covers, timing gears, instrument panels and windows. Just to mention a few uses. They are also experimenting with the manufacture of car bodies with laminated sheets, combined with Soya Flour Plastics.

They also make use of Soya Oil in the case hardening and the best treating of carbon steels. In the Royo lacquer finishing of the cars, Soya Oil has replaced Linseed oil 100% because of its better handling qualities together with the production of a better finish.

So much for the utilization of Soya Beans products in the motor car industry. The above is what one manufacturer has done; other car manufacturers are only commencing to utilize Soya Beans products, so the market there has only been scratched.

The south Manchurian Railway uses it mixed with a petroleum base as a lubricant on railway cars. This railway has made an artificial petroleum from it, which they claim can be used successfully to operate motor cars as a substitute for gasoline.

The oil is now used in the manufacture of printers' ink, cellulose, shellac and candles.

The oil treated with sulphuric acid or sulphur produces an artificial rubber. Mixed with carbon, it is excellent as the substitute for the pores of the natural rubber, thus preventing deterioration and decomposition by light and air.

Dr. Phillips of McGill University has found that Soya Powder with bleached sulphite pulp makes an excellent "after" for paper, and exposure to sunlight showed no discoloration occurred. Therefore, a use for Soya Beans products in the pulp and paper industry has been found.

The Soya Beans produce glycerol and glycerine and can be used in the manufacture of explosives. From the few examples quoted the farmer can realize the extent and possibilities of the market in industry for the Soya Bean. With the constant discoveries of new uses for the by-products in industry, the future of this continent is almost unlimited.

In conclusion, may we remind the grower that the selection and trial of the right variety for his soil and climate conditions may spell success or failure. He may have to select the best seed from his variety to plant the following year for success.

The Dominion Government has announced that by selection they have secured a variety called "Kakati" which matures ten days earlier than "Mandarin", from which it was selected. However, only a limited amount is available.

The farmer can carry out selection of his variety for earlier maturity the same way. Then, with ordinary care and attention, which only a few plant demands, success will crown his efforts with the production of a profitable product.

It is easy to show a surplus if you leave the bills unpaid.—Hon. G. H. Harrington.

## Gem Notes

Miss Kate George returned on Sunday to Normal in Calgary.

The dance given in the Gem School house by the Icelandic Art Society on April 8th was a great success. A large crowd attended, some from Rocky Mountain and Basano. The music was good and the prizes were good. The waltz prize was won by Miss Jean Plummer and Mr. Andy McLeod. The stimulation dance was won by Miss Pauline Cador and Bobbie Williamson. The door prize was won by Mrs. Hyatt. Two of the prizes were donated by Mrs. T. Magnus of Basano, the others by Williamson and Collins.

Mr. and Mrs. T. Harwell spent Sunday with Mr. and Mrs. W. McKay.

The weather is quite dry and windy and some of the farmers are already on the land.

Mr. Fletcher Williamson of Gem is holidaying in Basano.

## Tennis Club Hold Meeting

The Basano Tennis Club had its regular annual meeting on Wednesday night. A good attendance of enthusiasts were present.

The financial statement of the Club showed good standing with \$14.00 in the bank and no debts.

The following officers were elected: Pres., Archie Johnston; Vice-Pres., W. F. Macdonald; Sec.-Treas., Andrew Chabot.

Executive George Stiles, A. O. Wiley, Florence Playfair.

Plans were discussed for the season and it was reported that the Courts were practically ready to start playing.

The fees were fixed as follows: Senior Men \$2.00; Ladies \$1.00; Junior Men \$1.00; Family Ticket \$2.00.

Anyone wishing to join the Club should submit their intentions to Andrew Chabot.

## Harness Theft Charge Dismissed

On the 8th inst., Police Magistrate H. H. Edwards dispensed a charge of theft of harness laid against Thomas Steenson of near Husar, by local officers of the R. C. M. P.

According to the evidence, Robert Nairn, a well known local farmer, and a neighbor of the accused, had purchased a harness for \$150, five and a half years of harness. The harness was taken out of his barn at night and certain car tracks showed that a car of some kind had been used.

Sgt. J. N. Cusway made an investigation and gave evidence that a car the property of Steenson had time making the same kind of tread, but could find no trace of the harness, though search was made at various places.

No trace of the harness was discovered until January 1927, when Ed. Hodgkinson, finding some hay in the barn at the Springfield farm, uncovered the harness. It seems that in July 1926 Steenson owned the harness, but it was later sold to Douglas Fraser, and that Fraser had been in possession since then.

The harness was what was called a "new" harness and was in good condition. The Magistrate dismissed the charge on the ground that there was no direct evidence that Steenson stole it, or that he had it in his possession, or received it, knowing it to be stolen.

Constable Gillespie of the R.C.M.P. prosecuted the case for the crown efficiently. The accused was defended by Wm. McEwen, local barrister.

**MINK FARM TO BE OPERATED AT HUSSAR**  
—Hussar, April 6th.—The first Mink Farm has been started in Hussar. Mr. Phil Pringle, mink owner, has set up pens and has purchased a male and two females. Many visitors have been attracted, and hereafter it is being shown in the new venture.

# Coronation Celebration Plans Progressing

A well attended meeting of the Coronation Celebration Committee was held in the Town Hall on Monday night, April 10th. Much enthusiasm was shown by those present as to the success of the day.

All committees reported that so far good progress is being made with arrangements for the celebration on May 12th. Cash prizes have been arranged for the various races, and athletic events.

The days starting will open with a grand parade, starting at the Imperial Hotel corner and leading to the Sports Grounds. The parade will be led by the Royal Canadian Mounted Police, followed by the Boy Scouts and Girl Guides, Band, School rooms, Car and Flies, decorated Bicycles, Comic Costumes, and throughout the parade will be the fun making clowns.

Prizes for the parade have been arranged as follows:

1. Best Comic turnout, car, horse and buggy.
2. Best Decorated car.
3. Best Decorated Bicycle.
4. Best Comic costume (Boy).
5. Best Comic costume (Girl).
6. Best Comic costume (Adult).
7. Best Patriotic costume.

Upon arrival at the Sports Grounds the Scouts will perform the ceremony of unfurling and saluting the flag. This will be followed by all joining in singing "God Save the King". Community singing will provide part of the afternoon's entertainment, and an address and presentation of the Coronation medals will be made to the school children.

The Sports program is to consist of the following events. Cash prizes will be awarded.

- 50 yard dash
- 100 yard dash
- 150 yard dash
- 200 yard dash
- 250 yard dash
- 300 yard dash

- 750 yard dash
- 800 yard dash
- 850 yard dash
- 900 yard dash
- 950 yard dash
- 1000 yard dash

## HUSSAR LADIES' AID IN GOOD FINANCIAL CONDITION

Hussar, April 6th.—The April meeting of the Hussar Ladies' Aid was held on the 4th, at the home of S. W. Lawrie, with sixteen members and visitors present, and the president, Mrs. M. McEwen, in the chair.

According to the minutes, the Aid is in good financial condition, with all obligations met up to date. An interesting program consisted of a Easter reading by Mrs. T. Burnett, a poem by Mrs. E. J. Bell, an article on "Immortality," by Mrs. T. L. Montgomery, and a piano solo by Douglas Lawrie and one by Johnnie McLeod.

A guessing contest was won by Mrs. M. McEwen, and the consolation by Mrs. E. A. Holland. Next meeting will be held at the home of Mrs. J. Dundas. Plans will then be made for the work of the aid on the 24th of May.

## EMERGENCY MEASURES FOR CONTROLLING SOIL DIPPING (Lathbridge Experiment Farm)

A critical soil drifting situation is quite rare to prevail on many summer-furrowed fields in southern Alberta after the snow has all disappeared. Any fields that were drifting last year may be expected to start again as soon as they become bare. A serious condition such as this demands careful consideration.

The question that concerns the owners of these fields is what to do about it and the answer to this depends on the type of soil and the facilities available. Situations differ, but the answer is going has proved decidedly helpful on all but sandy soils. As soon as the frost is out of the ground deep cultivation with a duck foot has given better results than most other treatments. The cultivator will not meet the situation listing 6 to 7 inches deep with three later shovels replacing duck feet may give the desired results. Some farmers have gone to the extreme practice of using a duck foot throughout their fallows. Where this is done the ploughing must be deep enough to turn the fallow soil.

mind in any operation to check drifting is to get the work should start in the windward side of the field so that drifting will be checked as the work proceeds.

Lost to sight but in memories all ways dear.

Ever remembered by his son and wife.

Ed. and wife.

## EASTER REPORT FOR GRADES I AND II

Grade I: Repetitors: Freddie Greenwood, Florence Melting, Walter Laskowski, Irene Avery, Clifford Treiber. Beginners: Frankie Macbeth and Dickie Plummer (equal), Iles, Chalk, Bette, Bebbie, Joyce Jones, Billy Dixon, Marion Downs, Donald Grant, Norma Green, Billy Meldinger, Louvin Reimer, Bobby Dixon, Lorraine Melinger, Phil Marquardt, Norman Landless, Kenneth Smith.

Grade II: Mary Edwards and Lucy McBride 95.5; Ben Berlinger & Sally Laskowski 95; Peggy McKee 94.7; Joanne Leffage 94.5; Inebel Conn 90.5; Elaine Smith 92.7; Lois Smith 90.5; Annie Zee 85; Roy Downes 84.7; Gilbert Taylor 80.3; Margaret 77.5; Joie Headlock 75.5; Albert Mead 75.5; Hubert Treiber 75.3; Lorne Cliss 62.3.

Grace A. Scheer, teacher.

## FIRST CHURCH SERVICE OF 1927 HELD SUNDAY IN HUSSAR

Reverend A. R. Aldridge motored down from Rockyford on Sunday to hold services in the school house. The text was taken from the sayings of John Wesley, "The world is my parish." "One thing certain, God is with me." He was accompanied by his nephew, Mr. Brewell, his wife, Mrs. Brewell and Mr. Welch of Rockyford, all of whom went to Calgary. This was the first church service of the new year held in Hussar.

mind in any operation to check drifting is to get the work should start in the windward side of the field so that drifting will be checked as the work proceeds.

Lost to sight but in memories all ways dear.

Ever remembered by his son and wife.

## Lathom Notes

Gilbert Howard of Calgary was a caller at the Lathom home on Monday.

George Diamond returned home last week after spending the past month at Bearberry.

Mr. and Mrs. Freeman, Margaret and John were visitors at the home of Mr. and Mrs. L. Osterberg Sunday.

Mrs. S. Hains and daughter spent the week-end in Basano. Forrest Corvan was a Malaga caller Monday.

Mr. Head of Dalnaird will take charge of the farm purchased by the McKinnon Bros.

Mrs. H. Mott spent a few days visiting her daughter, Mrs. A. Hood, last week.

Leo Honohvalley is leaving shortly for parts unknown.

Mary Lane spent last week-end with her parents.

Stuart Winter is spending a few days with his sister, Mrs. J. T. Peasey at Rosemary.

A number of people gathered at the Community Hall last Thursday, Friday and dancing were enjoyed.

Mrs. M. Watter and Catherine spent Sunday evening at the Diamond home. Mr. P. Price spent Sunday at the Lathom home.

Mr. and Mrs. Munroe were callers at the home of Mr. and Mrs. Roy Clina last Wednesday.

Mrs. S. Oosting entertained a few people at her home on Saturday evening.

The L. C. C. will meet at the home of Mrs. G. Goudie April 24th. This being the first meeting of the new year, all members are urged to be present.

Mr. and Mrs. S. G. Oosting visited the Munros home Sunday.

Getting stuck seems to be a habit. How was the publishing, Bob?

Mr. and Mrs. G. Smith, R. Phil and Mrs. W. were Basano visitors Monday.

Any item of interest would be welcome to this column. If any person knowing of any, would they kindly leave same at the Lathom Post Office.

## Dorothy Notes

Roy McKinnon & family returned home from the States on April 1st.

Mr. and Mrs. Bryant, Mr. and Mrs. F. Thew went to Calgary on Monday, returning Wednesday.

Dorothy friends wish to extend sincere sympathy to Mrs. J. King during her recent bereavement.

Messrs. Thew, Mr. Thew Jr. and Bryant went to Drumheller on Thursday to see about seed wheat.

A very delightful party was held at the home of Mr. and Mrs. L. F. Shumacher on March 12 in honor of the birthday of Mrs. Shumacher.

The ladies of Duck Lake held a social meeting very little business was conducted. Mrs. E. Seely was elected president, Mrs. F. Thew vice-president, Mrs. Vermilion secretary, treasurer. A suitable name to be voted on at the next meeting which is to be held at the home of Mrs. E. Seely on May 20th. Circumstances prevented Mrs. Thew from being home however, but everything went off well from the ladies expected arrived, due to bad roads. Those present were Messrs. Seely, Mrs. Seely Jr., Dr. Rieger, Riemer, Dyck, Nagler, Oster and Misses Phyllis Vermilion, Sarah Bensen and Tina Bricker.

**IN MEMORY**  
John Oster  
Lost to sight but in memories all ways dear.  
Ever remembered by his son and wife.

## Board of Trade Holds Meeting

Following was the minutes of the regular meeting of the Board of Trade of Basano, held Wednesday, in the Royal Cafe. Present: members and two visitors were present. President James Johnston occupied the chair. The minutes of the meeting held on March 10th, were read and adopted.

**Re Coronation Committee Report**  
—Mr. W. Harger on behalf of the committee gave a report on the work done up to the present time, outlining the various dates taken over by the committee appointed by the Board of Trade.

**Property Committee Report**  
—Mr. Donaldson on behalf of this committee reported on the report of the various assessors of the Board of Trade and gave the names of the various property owners who had been assessed. The value of the property, as listed in this report amounted to \$1,850. It was then moved by Mr. Donaldson and seconded by Mr. Harper that this report be adopted as the basis for the assessment for the year 1927.

**Re Cemetery Road**  
In the absence of Dr. A. G. Scott, Chairman of the Cemetery, Health and Relief Committee of the Town of Basano, Mr. J. L. Donaldson reported that the cemetery road had been recently cleared of the snow and was in good condition, was favorable on this road the town planned on fixing it up.

**Re Fair Grounds**  
Moved by P. Harding and seconded by A. T. Connolly that the matter of cows grazing on this property and the use of the buildings by transients be brought to the attention of the Town Police, by letter from the secretary, carried.

**Re Lakes on Main Street**  
Mr. Harding brought to the attention of the Board the numerous complaints on main street and asked that something be done about it before Corbin.

In reply the president, James Johnston, stated that the town of Basano had made a day for clean up and with the help of everyone, these unsightly marks would be taken care of by that date.

**Re Departure of K. P. Thompson**  
The Board was informed by President Johnston that Mr. Thompson had left very suddenly to take over his new position as the secretary of the Board. He was away for a period of six months with the likelihood of his taking over at that point for a longer period.

Mr. Thompson was a member of the Board and seconded by A. McKee that the secretary be instructed to write Mr. Thompson conveying to him the well wishes of the Board. Carried.

**Re Visitors**  
The President on behalf of the Board extended to Mr. Ralph Baker, an old timer of Basano, their best regards on the eve of his departure to England, where he plans to make his new home. Mr. Baker in reply stated it was with regret that he was leaving Basano which he had called home for so many years, and wished the Board every success in the future.

The meeting adjourned at 9 p.m.

## HUSSAR BROWNIERS HOLD SURPRISE PARTY

Hussar, April 11th.—A grand surprise party was held by the Brownies in honor of Beryl and Shirley Lath, on Saturday afternoon, at the home of Peggy Hays, who was by Josephine Holland and Annie May Crow.

Peggy Hays was the hostess, and the Brownies are to have a picnic at the end of the week for Spokane, Wash. All those who have been Brownies were present, as well as six visitors. Games were enjoyed for most of the afternoon, among which was a newspaper race, which was won by Josephine Holland and Annie May Crow. Peggy Hays, acting as president, made a splendid speech, beseeching the guests to be good members, and presenting each with a photograph album and best wishes. Brownie Girl, Dorothy Nelson, and Tawny Owl, Marjorie Burnett, who received their warrants from Mrs. Tom Burnett, former Brownie Owl. A dainty lunch was served.

## BASSANO RECORDER

## ENLARGED SCHOOL UNITS

Despite the strenuous opposition originally aroused to the creation of the Enlarged School Unit idea, originally planned by Perrin Baker, Minister of Education in the Province Administration, and finally put into effect by the present Government, the plan seems to be making headway successfully.

Elsewhere will be found an extract from the Editorial Columns of our worthy contemporary, The Hanna Herald, where two such schemes are in operation, which speak well for further enlargement, or extension of the scheme as now laid down in the School Act.

Originally Trustees viewed the plan with suspicion and distrust, on the somewhat specious pretext that it would interfere too much with local autonomy, but particularly we suspect, with their then power over the fate and destiny of the school staff.

Later, and because of the apparent determination of the Government to proceed regardless of the opposition of Trustees, that opposition has subsided until it now amounts to nothing more than a mere whisper.

We understand that elsewhere in the Province similar schemes are in operation with much the same success as now seems to attend the venture at Hanna.

The present school year is rapidly drawing to a close, and will end on the 30th of June next. We have heard nothing official as to the inauguration of a larger school unit involving local rural schools, but if the plan is as successful elsewhere as it seems to be, it seems to us that the powers that be should now be bestirring themselves.

## PRACTICAL EDUCATION NEEDED

The following article taken from the editorial columns of the Peace River Record so well expresses our own views with respect to certain features of our educational system that we can do no better than present it as written. The whole article, and, particularly the penultimate paragraph, can very well be applied to local conditions.

"At an educational conference in Toronto this week, Dr. A. M. Overholt, principal of a Toronto High School, declared that our schools are wasting a large portion of the taxpayers' money through following what he termed the Oxford type of curriculum, rather than a more practical type of education to suit the needs of the majority of pupils. Dr. Overholt averred that the 'lazy duckling' and 'third rate minds' are a burden on our educational systems for which a remedy must be found, and that this must be found by weeding out those who will not work for their education, and altering the type of school training for those incapable of absorbing the classical type of education.

"Such a declaration from an authoritative source has been long overdue. A surprisingly large proportion of all municipal tax collections throughout Canada are being expended in an endeavor to provide a classical course in education for children who do not want it and will never use it or for providing buildings designed as school rooms but in reality used as parking places for beavers of flappers between dance dates.

"The old idea that every child should be provided with an education in the classics is as nonsensical as to believe that every child should be educated as a concert pianist. It is time we recognized both the wide variation in mentalities, and the probable vocational needs of different pupils in the matter of education, and adjusted our educational plans accordingly, giving better vocational training where that is required, maintaining provision for the smaller percentage who require classics, and weeding out those who persist in attending school year after year with no definite purpose.

"At least half our expenditures on public and high school educational work is waste. And even this is of small consequence in comparison with the wasted opportunities for those children who spend their school years attempting to absorb knowledge that is of no practical use, and losing the opportunity during those years of receiving vocational training that would prove invaluable in later life. Children have just so many school years. Why not give them the kind of training that will be of genuine benefit? They are not all Paderewskis or Einsteins, and it is a waste of their time and of public money to train them as if they were."

## FREE TRADERS

By self confession there are two free traders sitting in the House of Commons at Ottawa. R. J. Deachman formerly of Calgary and J. G. Ross of Moose Jaw, both Liberals, comprise all that remains of what was once a mighty host—at election time, Mr. Deachman denied vehemently the suggestion that he belonged to the select circle. And, of course, we have known all along that the Prime Minister never really tried to put it into practice, no matter how much he liked to toy with the idea from the public platform.

Appropos to the foregoing the House of Commons was treated recently to the spectacle of "High Tariff." R. B. Bennett attempting to induce a Liberal administration to reduce the existing tariffs on galvanized sheet metal coming into Canada from Britain and the United States.

## SCHOOL DIVISIONS

## "PAYING UP"

Amalgamated into two school divisions, the Hanna Herald, in operation within Alberta, some 45 schools in the country (the Hanna Herald, however, is operating under much less difficulty than under the old system. Harry Creek School Division No. 1, as the name implies, provided Alberta's first experiment into the realm of larger units of administration. This experiment proved an outstanding success under the supervision of L. A. Thuermer, who has since been transferred to Red Deer. Now, a second school division, Hanna Lake No. 2, centres on Hanna. It is well organized and promises to repeat Harry Creek's success. Both are under the supervision of J. C. Johnson, superintendent, who is assisted by a divisional Board of Trustees in each.

When first proposed these "larger units" met with considerable opposition from those in the school districts concerned who felt that sacrifice of local autonomy was too great a price to pay, even for what promised to be more efficient and economical management of the school system. Upon better understanding of the provisions of the amended School Act, there appears to be a growing spirit of co-operation between the school trustees in the various school districts and the Divisional Board.

It is encouraging; for without the ready co-operation of school district officials the best interests of the ratepayers and school pupils cannot be served. While the handling of funds has been taken out of the hands of the individual school-district board and vested with the Divisional Board, we think this feature is welcomed in not a few districts where financing has been most difficult, if not impossible. In describing the duties of the Divisional Board, the Act provides among other things that it shall be the duty of every Divisional Board "to pay every month the salaries of all teachers in its employ." Being relieved of this responsibility alone should be cause for rejoicing in the ranks of the school district trustees. If teachers can regularly secure their salaries under this new scheme it is more than could be said of the old school district set-up, in arrears where tax collections were inadequate.

If any day can be regularly observed in these new School Divisions this achievement alone should be sufficient to win approval. And a good start has already been made along that line. The new school divisions have much to warrant general support.—Hanna Herald.

## Husar Notes

Mr. and Mrs. Roy Hulien are having a sale of personal and household effects on Thursday and, with their daughters Berri and Shirley, will be leaving at the end of the week for a new location near Spokane, Washington.

The Husar W. I. will meet at the home of Mrs. Ben Campbell on Thursday afternoon, April 22nd. Arrangements will then be made for attending the convention in Calgary, May 25th to 28th. Mrs. V. LeGrand is the official delegate.

Miss Peggy Reeves who has been visiting here for the past three weeks returned to Lomond on Tuesday.

Mrs. L. F. Snyder and infant son came home the first of the week.

Born—A daughter to Mr. and Mrs. Roy White, on April 4th, at the Bassano Hospital.

Mrs. R. Gilbert and G. F. Burns of Spokane were business visitors on Monday, returning with Mrs. Betty to Calgary on Wednesday.

Mr. Fred Johnson who has been in Calgary all winter owing to the illness of his son, who had a critical medical operation, returned to Husar the first of the week.

The Girls' Club of the W. I. will hold the annual provincial convention at Olds Agricultural School on July 12-15. A very interesting demonstration has been planned.

Miss Dorothy Innagan spent the weekend in Calgary.

Mr. A. P. P. and Miss A. P. P. and Miss B. Legat moved to Drumheller and Calgary at Saturday.

On Saturday afternoon Mrs. J. C. Joseph entertained the Husar W. I. Girls' Club. Games were played for entertainment. Miss Betty Holland winning the prize for highest proficiency. A dainty lunch was served.

A mistake is not a misdemeanor. A failure fits you to make no more mistakes of the same kind.

## Bassano Municipal Hospital

DISTRICT No. 6

## NOTICE

A New Ruling made by the Board of this Hospital on March 6th, 1937:—

"On and after the first day of May, 1937, an advance payment of at least five dollars must be made by all maternity patients on, or before, admission to hospital.

This Ruling applies to maternity cases only.

## Tid-Bits from the Kitchen

## Sauces

Chocolates Sauce—  
2 cups of brown sugar  
1/2 cup cream  
1/2 cup milk  
1 teaspoonful vanilla  
Melt chocolate and sugar and mix well. Add butter and cook until mixture forms a soft ball and then serve while hot.

## Fruit Dressing—

Juice of 2 oranges  
2 lemons  
2 eggs  
1 cup of sugar

Cook until thick, add whipped cream

## Lemon Butter—

1 cup butter  
1/2 cup sugar  
4 egg yolks  
2 egg whites  
2 lemons (rind)  
2 lemons (juice)  
Cook in double boiler

## Hints

In order to keep dumplings from sticking to the spoon, wet spoon before lifting each dumpling.

If potato chips are soaked in cold water for a while and then drained and dried on a cloth, they will be more crisp.

## A "Hoi Trick" in Life Saving

Three life-savings in one day was the record made by Eagle Scout Joseph Holm of Philadelphia. During an afternoon at Peck's Pond in the Pocono Mountains last summer he rescued a baby, a girl swimmer who had gone into difficulties, and a girl who had broken a leg when tumbling from a narrow diving board. For the latter girl he improvised a splint and saw her safely to a hospital five miles away.

"When it comes to spending money," says a critic, "we must hand it all to the government." We do.

### Morrison's Radio Service

"Where Old Radio Are Made Like New"

MRS. PHOEN 186

BASSANO

Scouts began last week with the usual Physical Training. It seems that they are never able to rest. A few days when they arrive late, Mr. McEwan had to leave fairly early, owing to business, and it seemed as if he was trying to make up for the time that he would be away. He put the Scouts through stiff physical and signalling exercises, after which he left. Assistant Scout Master Ted Calbeck gave a first Aid lecture on bandaging. When he was finished, which, by the way was not until 8:30, Scouts were dismissed.

Cervantes Thanksgiving Service in Abbey for RAMP Scouts and Guides. A special Boy Scout and Girl Guide Thanksgiving Service in Westminster Abbey on the afternoon of Saturday May 12th, will be attended by 6,000 boys and girls. The gathering

will include Scouts and Guides from overseas, in London for the Coronation. The Bishop of Bristol will preach the sermon. The choir will be made up entirely of Scouts in uniform.

### Makepeace Notes

Mr. and Mrs. Jack Bulger and Ed Martin were Bassano callers on Thursday.

Several farmers of this vicinity have started spring work.

A baseball game was held at the Makepeace school on April 18th. A large crowd attended and an enjoyable time was had by all.

P. Holtan made a business trip to Calgary on Monday.

Mr. and Mrs. C. Sutton and daughter of Milo were Sunday visitors at Makepeace.

Miss Alice Portney spent the weekend at her home.

Mr. and Mrs. Ed Martin and Shirley spent Sunday evening at the Campbell home.

Edgar Mullen had the misfortune of spraining his ankle.

Mr. and Mrs. P. Holtan and family spent Sunday at the Cowan home.

Mr. and Mrs. Jack Bulger motored to Calgary on Monday.

The ball team are busy organizing their team for the summer.

Congratulations to Mr. and Mrs. Kay Larson on the birth of a son.

Jessie Walters and Gordon Jones were in Bassano last week.

Mr. and Mrs. Thomas Mullin and girls spent Sunday with the Kuckle family.

Miss Doris Holman has gone to the coast for a couple of months.

### So They Tell Me

By the Cab Reporter

Roy Gayford perched on the top of a thirty foot ladder holding a bucket of water.

"Farmer John" acting in the capacity of dog catcher. The howling of his canine companion attracted many comments and suggestions from on-lookers.

Tom Henders and Sherry Lafage excavating a section of main street.

"They may be oil in that hole."

Andy Jacobson reported plowing through mud that reached the top of the radiator on his car. Who says this is a dry country.

Who was the young man sitting on the sidewalk with his head between his knees. We suppose he was just resting.

We haven't anything of any importance this week about Alf. However, just to keep his name in this column for another week, we'll just mention that Alf is the one who does all the work making up the hockey pool.

Frank Gayford being congratulated on his first win.

Numerous are the stories regarding the ability of the Scandinavians, but without casting reflections on either nationality, the other night was the first time we ever saw a Norwegian enacting the part of a monastic English gentleman.

### BUILDING UP A TOWN

An exchange offers the following advice on how to build up a town.

Talk about it.

Write about it.

Help to improve it.

Recruit the streets.

Patronize it's merchants.

Advertise in it's newspaper.

Elect good men to all offices.

Speak well of it's enterprising public spirited citizens.

If you are rich, invest in something, employ somebody, be a "booster".

If you don't think of any good word to say, don't say anything but good.

Remember, every dollar you invest in a permanent improvement is that much on interest.

Be courteous to strangers that come amongst you, so that they go away with good impressions.

Always cheer up the men who go in for improvement. Your portion of the cost will only be what is just.

Don't kick about any unnecessary public improvement because it is at your own door or for fear that your taxes may be raised fifteen cents.

Above all, never spend a dollar out of love that gets you in for the same purpose to town.

Buy your goods, employ labor, pay your taxes at home. —Amherst-Rich.

### HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES OF CANADA

KEEPING ONE'S FEET DRY.

It is surprising how important to our well being are some of the apparently trivial details of our everyday life. For instance, consider the simple rule to keep one's feet dry.

Few indeed are the simple health rules, the observance of which pays such high dividends.

In a climate like ours where rain comes frequently and where soft snow and slush are encountered many times a week, it is not always easy to keep the feet dry.

Rubbers and overshoes raise a nuisance and it is very tempting to go out without them. Before one realizes it the feet get wet. It may be hours before a change is feasible and during that time the feet feel chilled.

The "resting" mechanism of the body becomes deranged and before we know it another cold has developed. Few things seem to hinder the resistance of the body to infection as quickly as wet feet.

Children particularly require careful watching. They will slip off to school without rubbers and mittens, they will carry on routes to test out each strength of "rubbing" ice and snow out of their way to reach the mudslide; they may have to sit until late afternoon without an opportunity for a change.

Absolute insistence upon warm feet always pays. With rapidly growing boys and girls rubbers and mittens quickly become out-grown, but it is cheaper to buy a new pair than to pay for the cost of an illness.

Shoes should have thick soles in winter or in wet weather. Half-boating when required is not a luxury; one cannot risk putting it off. In winter, sportswear and other boots should be kept waterproofed. Heavy wool socks and socks are to be recommended. When driving or motoring long distances in cold weather, the feet should be kept warm always.

One essential point to keep in mind is that most danger comes, not from getting the feet wet, but in letting them remain that way. There is very little danger if one can change at once into warm dry footwear. If the feet are chilled as well as wet, they should be rubbed until the circulation has been restored and, if necessary, a warm footbath taken as well.

### Crowfoot Notes

Mr. P. Holtan and E. W. Campbell made a business trip to Calgary on Monday.

Miss Alice Portney paid her mother a week-end visit.

The dance at Makepeace school on Saturday night was a very successful affair—good music, and a good time. There was a few out from town.

Mr. H. J. Root and Mrs. Hoffmann visited with Mr. and Mrs. J. McLaughlin at Queenstown on Sunday.

Tom Rodbourne was a guest of Verle Campbell over the week-end.

Mr. and Mrs. P. L. Walker and sister, Miss Mary Murchison were callers in the neighborhood on Sunday.

Mr. Stiles Rodbourne together with Mrs. Frank Rodbourne motored to Calgary Saturday, where they expected to have Mr. Charles Rodbourne and Mrs. Bluer return with them.

Mr. Alf Mauer made a business trip in the district Monday.

Mr. Andy Jacobson is now able to make his usual trips around the district on his cream route.

Mrs. Glenwald and son and Mr. O. Bray were dinner guests at the home of Edna Bray and family.

Mr. Herbie received the sad news of the death of his brother George, in Harrington, Kansas. The community extends sympathy to Mr. and Mrs. Herbie.

Mr. Edgar Mullin is a lucky boy, and a very wise one, for he knows that was very close to a bad accident when he was thrown from his saddle horse.

"GREEN LIGHTS"

A Drama of a Doctor's Sacrifice to Save Humanity

Friday and Saturday, April 23 and 24

Alice Faye and Adolphe Menjou in

"SING BABY SING"

The maddest, merriest, melange of moving picture mania's ever assembled. Seven comical cuckoo comedians on a

chase from Manhattan to the Mississippi with a Manhattan

julep on the trail of her Broadway Romeo.

SHOW STARTS AT 8:30 P.M.

### SCIENCE AIDS GOLF GREENS

At this time of year the impatient golfer is burning and brandishing his clubs and tending to be on the course. The greenkeeper notes the signs and begins to prepare himself for another season of abuse and criticisms from angry and ungrateful members who presume to know better than he how greens and fairways should be treated. Every golf club has a few of these "experts" who are not only ignorant but who know his business pays off the badness of his business.

The science of green-keeping is a complex and profound, demanding knowledge of soils, plants, fertilizers, pesticides, herbicides, fungicides and more besides, while the art finds expression in shaping the contours of greens and applying the science in the construction of physical hazards, such as bunkers and sand traps, which prove afflicting for the golfer. It's all in the game, and many an aspiring, perspiring golfer, digging his ball out of the sand, may be reminded momentarily of a neglected garden, where his exertions, without the expertise, might be applied to better purpose.

Contending with Nature

Among the hazards of green-keeping are the incursions of weeds on green and fairways, the menace of fungus disease such as snow-mould and brown patch, winter-kill and damage to the turf by earthworms which leave their unsightly casts on the greens to the annoyance of both greenkeeper and player. But the greenkeeper who keeps abreast of the times knows how to control the fungus diseases with organic fungicide preparations and how to make the worms curl up their tails with arsenate of lead. The turf on the putting greens is produced and maintained under conditions so artificial that the green-keeper has to wage a constant contest with nature. He can control weeds on the greens to some extent by the use of proper fertilizer, and he must apply it liberally and timely, so that the grasses may receive in due season the balanced ration of available nutrients required for their vigorous growth. Complicated time in April, for the fertilizer may be applied to the greens once in every four weeks, withholding it during periods of extreme heat which may be in July and early August.

The high wind of last week dried up the land sufficiently to permit some of the farmers to get in the field. Edna Bray claims distinction of being the first last Saturday. With favorable weather conditions seedling will be fairly general the latter part of the week. One or two reported up to present, it was too wet to get into the fields.

Mr. and Mrs. Joe Burger spent Sunday evening at the Hoffebower home.

Mr. and Mrs. Carlyle Sutton of Milo called at the Campbell home and on Mrs. Sutton's brother, Howard Larson on Sunday.

Mr. and Mrs. Penwick motored to Drumheller Sunday to visit with Penwick's parents, Mr. and Mrs. Gogge.

Mr. and Mrs. Jack Bulger drove to Calgary Monday and brought back a lovely red V-8 light delivery truck. The trade was made through Roy Smith, Bassano Dealer.

Mr. and Mrs. Fred Bulger made a business trip to Mossleigh on Tuesday morning.

Miss Doris Holman who has just completed a business course at the Carbutt's Business College in Calgary left for Vancouver where she has accepted a very good position.

Just before a report was about to begin, a well known soprano found that she couldn't sing. Many vocalists, unfortunately, never do find it out.

inst. The final application for the season may be made about mid-September.

Fertilizing Greens

The fertilizer used by the greenkeeper is not the same as that which the farmer applies to his grassland. Greenkeepers are on the putting greens, which are not so fertile as the latter is encouraged by plenty of available supplies of phosphate and potash. Nor, either is what the green-keeper does not want, though it will creep in despite his efforts to keep it out. A precautionary measure is to use a fertilizer in which nitrogen predominates, almost to the exclusion of phosphate and potash. Another is to keep the soil of the greens distinctly acid in reaction which may be accomplished by means of acid forming fertilizers containing ammonia nitrogen. Clovers, broad-leaved grasses and dandelions are less tolerant of acidity than are the finer berries and fescues, and the reason for endeavoring to establish acid conditions.

Acidity in Greens

Results of recent research disclose that soil acidity is not a prerequisite of weed control but that it is the ammonia, radiate which is present in plants such as clovers, yarrows and other weeds low in carbohydrates. On the greens of many a "course" artificial created acidity has become so extreme that applications of lime to restore equilibrium have been unnecessary. Phosphate, because of its favorable influence on root development and its action in precipitating soluble aluminum which is toxic, and potash, now recognized as effective against fungus diseases, are both accepted a place in the modern, approved 16-5-2 fertilizers for golf greens.

The System Works

Science aids the green-keeper in reducing the hazards of his profession, and the intelligent use of fertilizers is said to be the best method of improving mechanical appliances at his disposal include the useful implement for sprinkling greens, permitting the aeration of the soil and deeper penetration of plant roots. Among courses on which systematic treatment of greens and fairways has been practiced for years is that of St. Andrew's Golf Club, Toronto, where the title Championship was held in September, 1935. Despite unpropitious weather, the course was in excellent condition, winning unqualified praise from players and spectators alike.

## Local and Personal Notes

Born—To Mr. and Mrs. Wm. Lee, Bassano, a son on April 7th, 1937.

Died—on April 15th, the infant son of Mr. and Mrs. Wm. Lee.

Mr. and Mrs. L. McIntosh of Brooks were in town recently on a few days.

Miss Ellen Anderson was the guest of Mr. and Mrs. J. Morgan for a few days.

Mr. R. Brown was a Calgary visitor over the weekend.

Mrs. O. Morrison returned from Edmonton where she has been for the past few days, on Monday night.

Miss Molly Berry was practice teacher at Alderson last week, from normal, where she has now returned.

T. N. Simpson and J. M. King started their logging operations on Monday.

Mrs. Osham and daughter, Marjorie, of Duesbury, were Bassano visitors on Tuesday.

Misses Dorothy and Carolyn Beeber spent Thursday and Friday in Calgary.

Miss Viola McCallan spent the weekend in the city with her father who is seriously ill.

Miss Hazel Barlow, teacher at Glanville, spent the weekend with her parents, Dr. and Mrs. Barlow.

The Greyhound bus had a delayed stop here Saturday night, due to motor trouble.

Mrs. Art Bowman returned from Medicine Hat where she has been visiting her mother.

Mr. Ralph Holton spent Sunday with his parents, Mr. and Mrs. P. Holton of Makepeace.

There will be ball practice at the new diamond in the Sports Grounds on Sunday next, at 2 p.m. Every-one interested please attend.

Mr. Verne Thompson visited his parents, Mr. and Mrs. A. Thompson for a few days. Verne attends the University of Alberta.

Miss Betty Plummer has gone to help her brother, Ben, for a while. He has a farm on the Brooks-Duchess road.

Mr. Jud Pickup, son of Mr. C. Pickup, local Presbyterian Minister, spent Saturday evening and Sunday with Robert Currie.

Miss Dorothy Flanagan of Lawson School spent the week-end with her parents, Mr. and Mrs. W. L. Flanagan.

Miss Beatrice Oulton made her weekly visit to Church and Gleaners on Friday, where she has large piano for classes.

Mr. and Mrs. W. Swanson and family of Brooks visited at Macleath on Sunday. Jane Swanson is visiting for a few days longer.

Mr. Norman L. Scott, Sales Manager for J. Ashdown Hardware Ltd., and a former citizen of Bassano, was in town today on business, and renewing old acquaintances.

The Recorder understands that Dr. R. E. Barlow has taken a position as Veterinarian on the Staff of Military District No. 13 with headquarters in Calgary.

Ralph Baker of Flanagan was in town for two days this week, saying hello to friends of long standing, and celebrating his contemplated departure for England.

Mr. W. A. Shultz, Supervisor of Municipal Hospital for the Provincial Government, is making the annual inspection of Bassano Hospital today.

Mr. and Mrs. Lawrence Larsen and daughter, Mr. and Mrs. Walter Larsen, Mrs. T. B. Board and daughter, and Miss Mary Wain of Arrowwood were Sunday visitors at the home of Mr. and Mrs. Norman Cary.

HUNTER TURKEYS  
AVERAGE 5-6 LBS. 14 OUNDS

Hunter can certainly raise turkeys. Six "Toms" belonging to Mr. Herb Crough were sold in Calgary last week averaging 14 lbs. and graded "T" by Government test. They were of the Bronze variety.
